This work is brought to you for free and open access by FIU Digital Commons. It has been accepted for inclusion in Sea Level Rise Collection by an authorized administrator of FIU Digital Commons. For more information, please contact [dcc@fiu.edu](mailto:dcc@fiu.edu).

# Eyes on the Rise

## Students Digitize SLR Work

JANUARY 18, 2016 / TED GUTSCHE / 0 COMMENTS

Students in Ted Gutsche's Visual Storytelling course in FIU's School of Journalism and Mass Communication are curating and archiving work related to sea level rise produced at FIU as a way to learn about the digitization of museums and libraries, while contributing to the university's [Digital Collection](#).

Already, the library's collections hold information [about rising seas](#), but this new effort will add video, animation, infographics, and public documents to an exploding area of research and journalism — environmental change in Miami.

The screenshot shows the FIU Digital Commons website interface. At the top, there is a navigation bar with links for Home, About, Resources, FAQ, and My Account. Below the navigation bar is a search bar and a list of links for browsing research and scholarship, including research units, selected works galleries, journals, and theses. The main content area displays a search result for a report titled "Users Acceptance of Online Enrollment Processes in a Higher Education..." by Lisa F. Rodriguez, presented at the South Florida Education Research Conference. The report is shown with a world map indicating its location in Palo Alto, California. Below the map, there are statistics for recent downloads (8 of 37 in the past hour) and total downloads (1,354,656 total, 394,534 in the past year). A small pie chart shows the breakdown of these downloads by country. The right sidebar contains a search bar, advanced search options, and a list of links for Florida International University and FIU Libraries.

Read more about the project and follow along [here](#).
