

## Full Papers for Proceedings

ICOT 18 Miami invites you to submit your full proposal for the conference proceedings. This is optional. With the theme “Cultivating Mindsets for Global Citizens” we aim to create awareness about global issues and the big questions that the next generations will inherit from us. Together we will explore strategies for deeply engaging citizens as young as toddlers up to seniors in understanding world issues from different points of view.

The [tracks](#) reflect the transdisciplinary nature of the conference, as well as the imperative for creative and collaborative solutions to ensure a better world in the future. The scientific committee proposes four tracks with guiding questions. We invite you to share your big questions and engage readers in thought- provoking conversations towards thinking and global-mindedness. Please see the Conference Philosophy <http://icot18.com/themes/>

Full proposals are **limited to 3000 words** and connected to the conference theme and focus on the conference subthemes.

Click each track to access the guiding questions

- [Education, Learning and the Brain](#)
- [Health and Well-being](#)
- [Environmental sustainability](#)
- [Population movement, integration and global citizenship](#)
