01

What are the Digital Humanities?

A very very brief overview

02

Some Covid Considerations

Digital tools best practices

03

Hypothes.is

For collaborative annotation

04

Voyant

For text analysis

05

TimelineJs

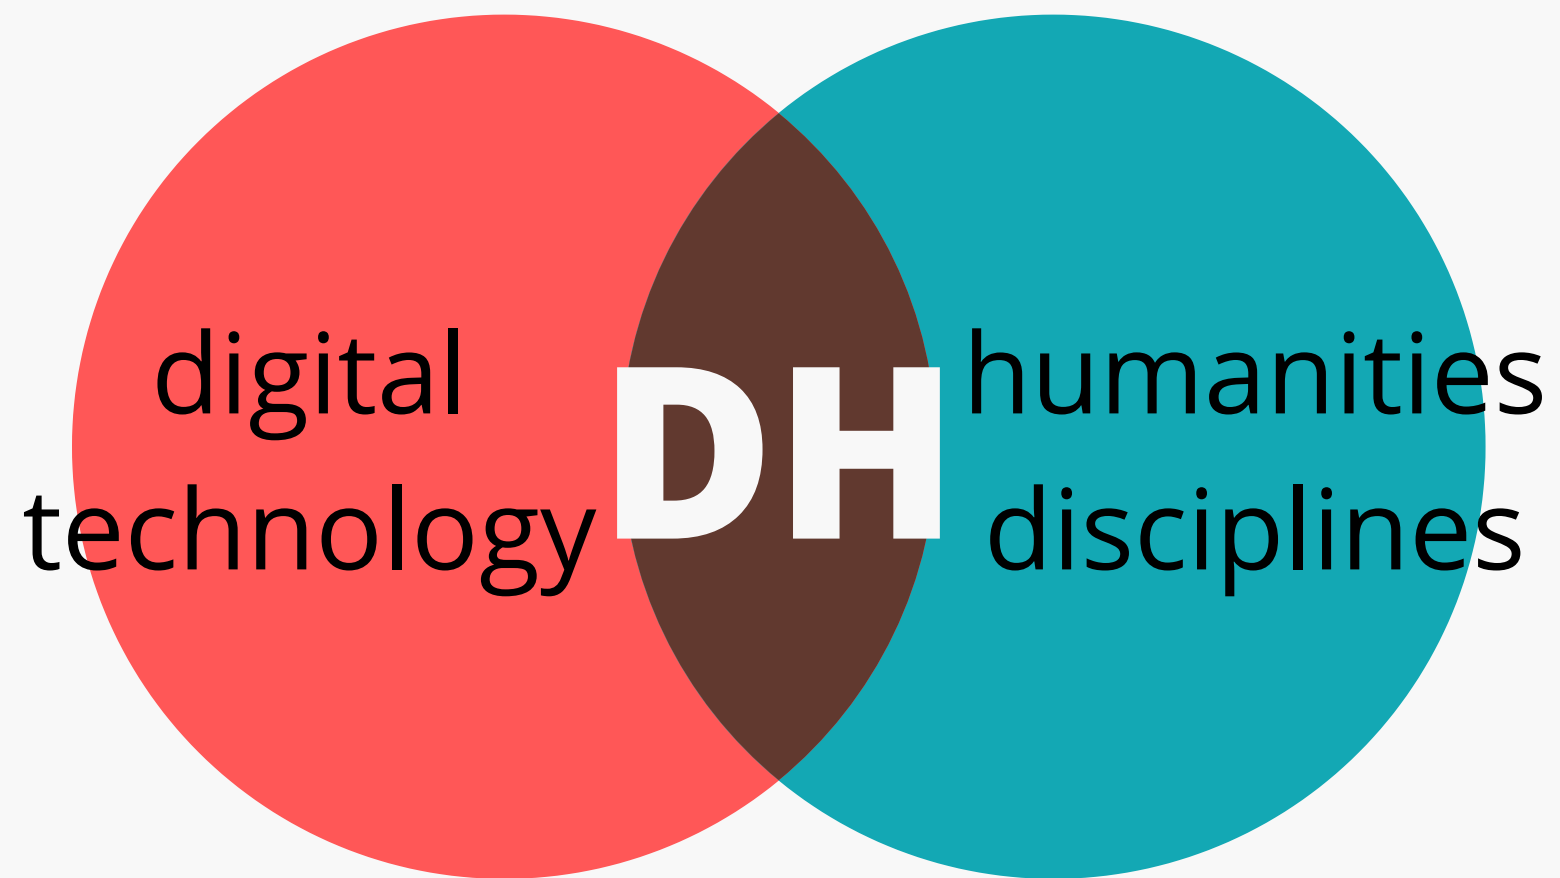

For interactive media-rich timelines

06

Questions

And sharing!

OUTLINE

What are the Digital Humanities?

It depends!

I see them as a community of practice straddling both digital technology and the humanities disciplines.

This spans from large funded projects in digital archiving to research in the history of computing to using tools like Zotero in our everyday research.

Why use DH tools in the classroom?

DH tools can encourage digital literacy, creativity, collaboration, personal agency, and tangible contribution to knowledge production.

And we are also relying HARD on the digital right now...

01

Become comfortable with the tools before you unleash them on your students.

02

Let students opt out, or offer alternative ways to complete the assignment.

Considerations

For always, but especially relevant in Covid times.

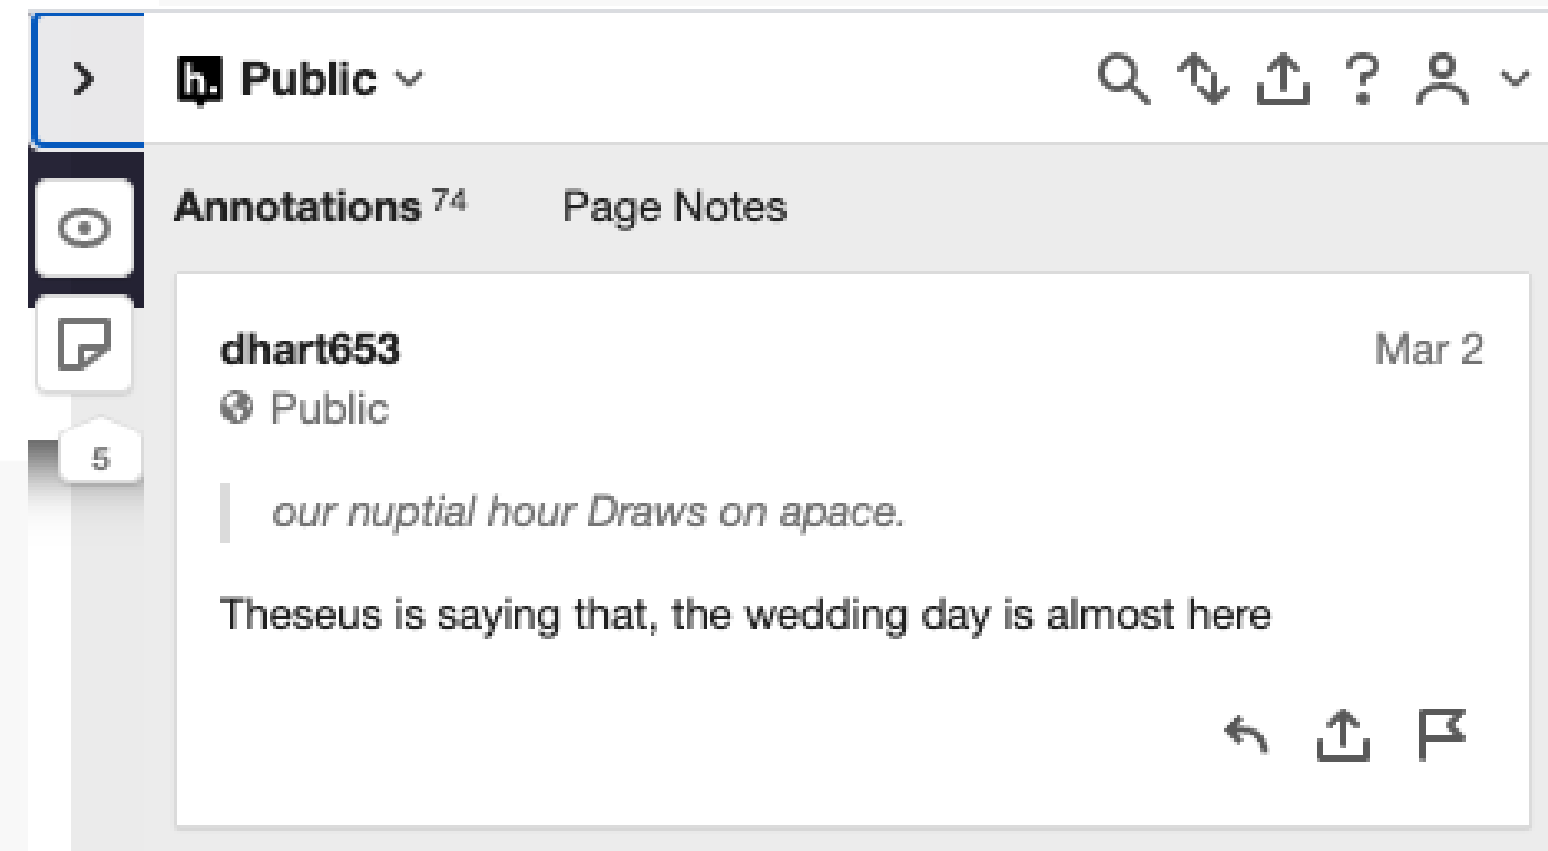

hypothes.is

Home

 Hypothesis / dwhly

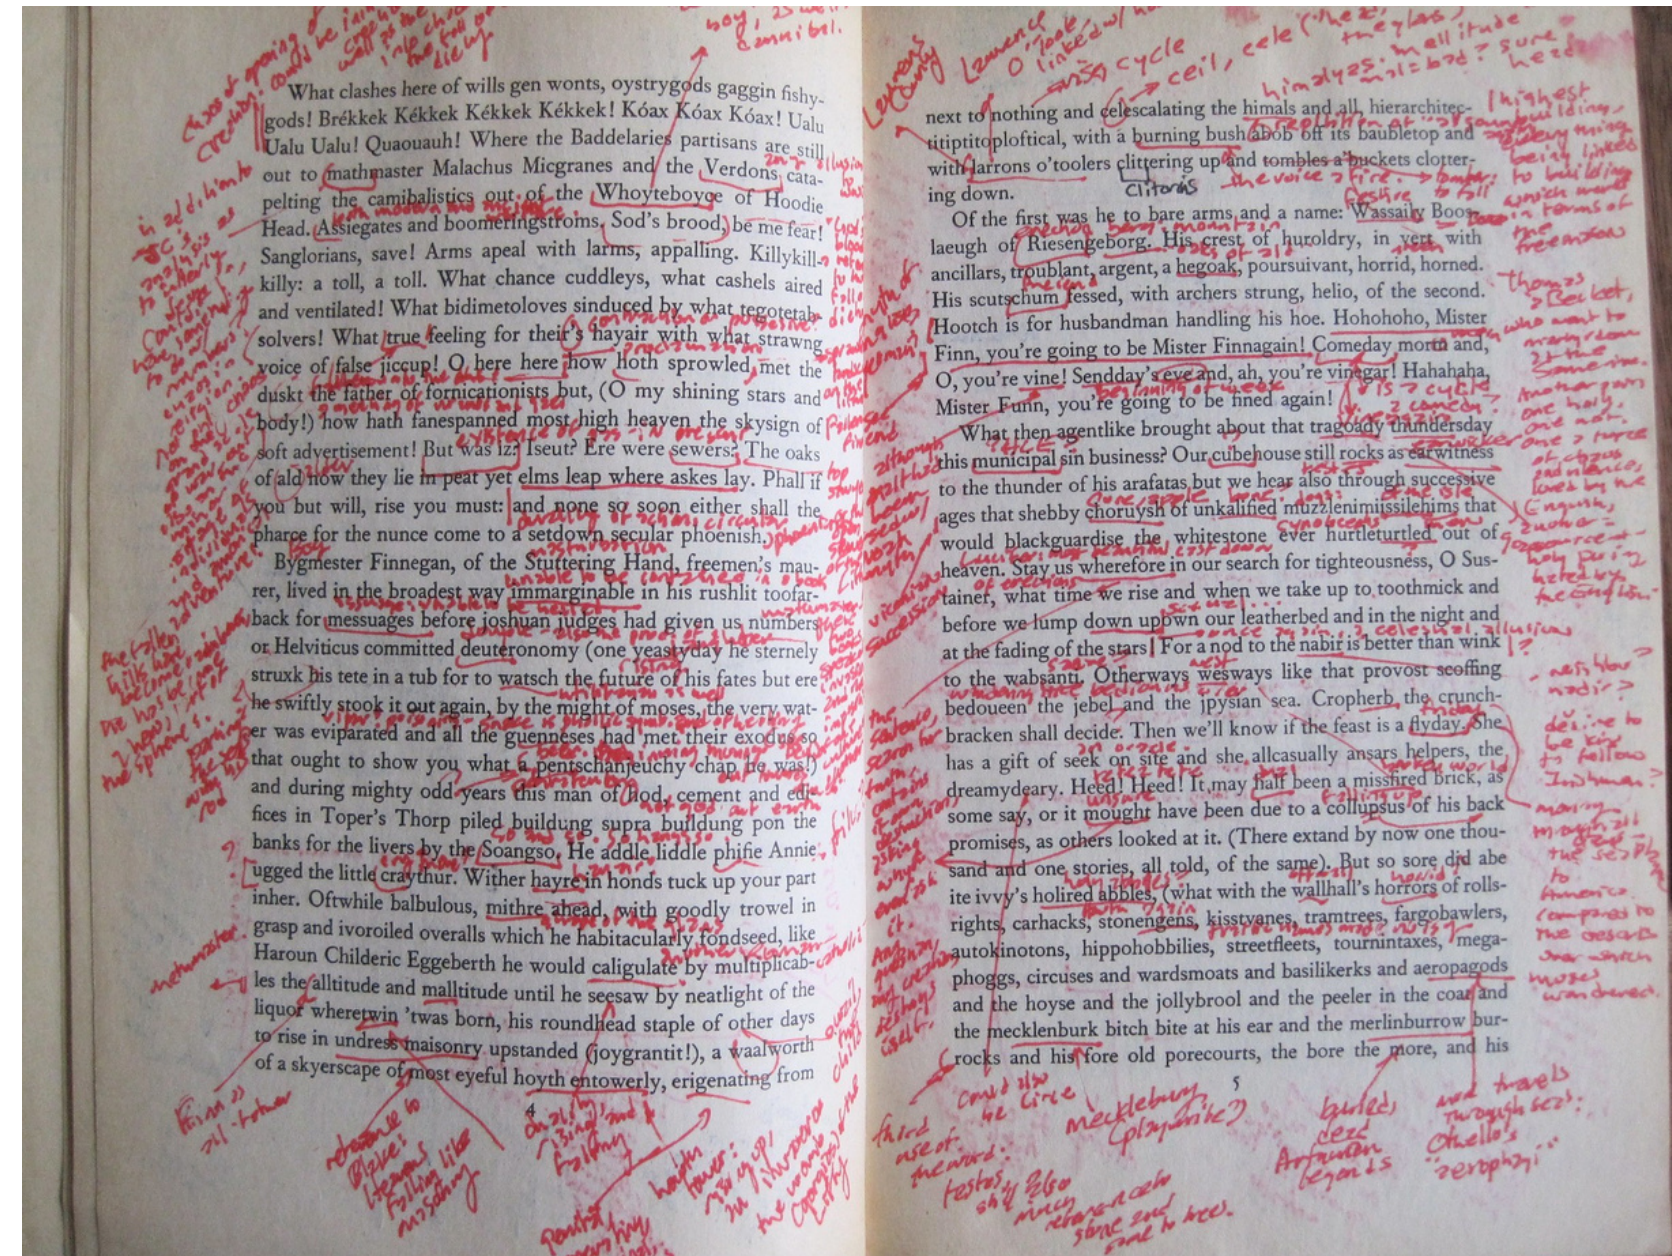

Hypothes.is is an open-source browser plug-in that allows you to annotate anything on the web.

The screenshot shows the Hypothes.is browser extension interface. At the top, there is a navigation bar with a right arrow, a "Public" dropdown menu, and several utility icons (search, refresh, share, help, user). Below this is a header for "Annotations 74" and "Page Notes". The main content area displays an annotation by user "dhart653" on "Mar 2", which is "Public". The annotation text is "our nuptial hour Draws on apace." followed by "Theseus is saying that, the wedding day is almost here". At the bottom right of the annotation box are icons for back, share, and flag.

<https://web.hypothes.is/start/>

Why do we annotate?

"Annotations Finnegans Wake" by Medieval Karl on Flickr is licensed under CC BY-NC-SA 2.0

1

Sign up to annotate.

You need a free account to start annotating.

A Midsummer Night's Dream

Scene 1

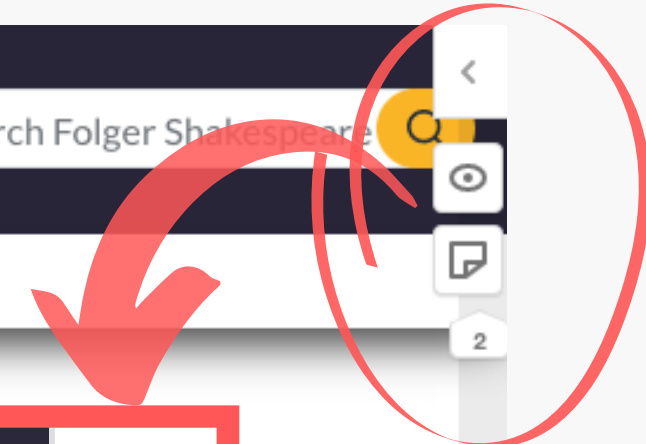

Enter Theseus, Hippolyta, and Philostrate, with others.

THESEUS

Now, fair Hippolyta, our nuptial hour
Draws on apace. Four happy days bring in
Another moon. But, O, methinks how slow
This old moon wanes! She lingers my desires
5 Like to a stepdame or a dowager
Long withering out a young man's revenue.

HIPPOLYTA

Four days will quickly steep themselves in night;
Four nights will quickly dream away the time:

Scene 1

Enter Theseus, Hippolyta, and Philostrate, with others.

Ne... shall behold the night
Of our solemnities.

Annotate Highlight Show

THESEUS

Go, Philostrate,

Stir up the Athenian youth to merriments.

Awake the pert and nimble spirit of mirth.

Four nights will quickly dream away the time;

Annotation: 10 Ways

This was a really great post! Thanks for writing it!

jeremydean Public (edited Aug 26, 2015) Aug 26, 2015

but in conversations with educators of late I've come to realize that we often mean different things by the word "annotate."

In particular, a recent NWP webinar with professors, teachers, and students about web annotation influenced some of my thinking here. Thanks to Erick Gordon, Adele Bruni, Nathan Blom, and Louis Lafair!

Back to School with Annotation: 10 Ways to Annotate with Students

By **Jeremy Dean** | August 25th, 2015

It's back-to-school season and I find myself once again encouraging teachers to discuss course readings with their students using collaborative web annotation technologies like Hypothesis. Though relatively new to Hypothesis, I've been making this pitch for a few years now, but in conversations with educators

Ways to use Hypothes.is in the classroom

Have students help each other understand a complex text

Use annotation for a seminar-style discussion

Instructor pre-populates a text with questions or key points

Tag key themes so they can be searched later

Have students annotate your lecture notes/slides

Use multimedia in annotations

VOYANT

see through your text

Add Texts 🔍 🌙 ?

Type in one or more URLs on separate lines or paste in a full text.

Voyant Tools is a web-based reading and analysis environment for digital texts.

<https://voyant-tools.org/>

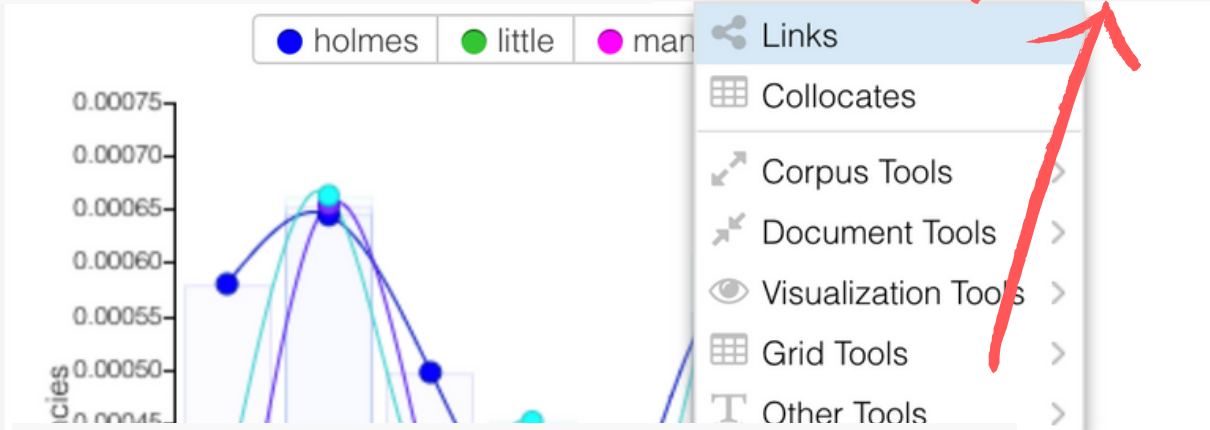

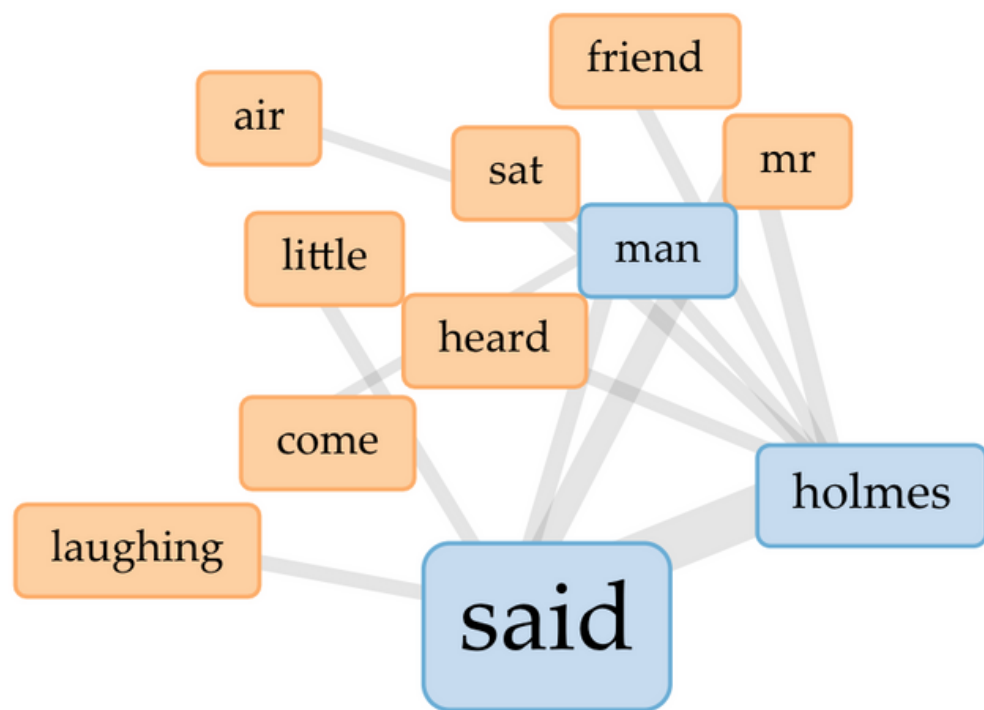

What is text analysis?

The practice of treating words and other textual elements as data.

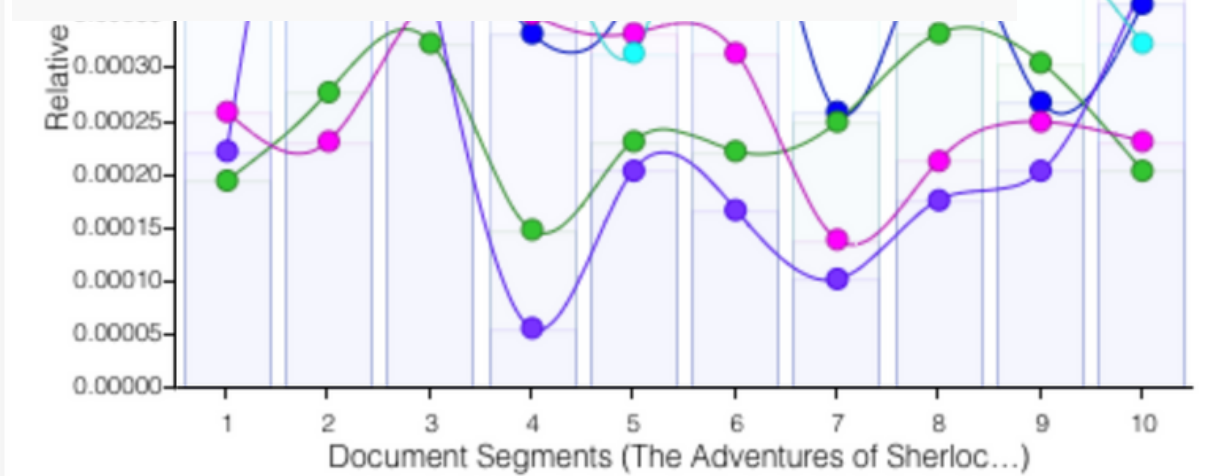

For example, we might use algorithms to count word frequencies, co-occurrences, or to cluster statistically generated topics in a text or body of work.

It is sometimes referred to as "distant reading."

Click the "windows" to change tools

Click the slider to change tool settings

Click the question mark to learn about the tool

Term	Collocate	Count (context)
<input type="checkbox"/> said	holmes	128
<input type="checkbox"/> mr	holmes	94
<input type="checkbox"/> said	mr	39
<input type="checkbox"/> mr	said	31
<input type="checkbox"/> holmes	said	24
<input type="checkbox"/> holmes	mr	23

Voyant in the {virtual} classroom

01

Have students play

Ask them if they got results they were expecting from the text or from different tools. What trends and patterns emerge?

02

Have them look at their own writing

Loading their own essays into Voyant can be eye opening for the revision process!

03

Use Voyant to generate search terms

Put a core class reading into Voyant to discover keywords for further research -- see lesson here:

<https://lessonplans.dwrl.utexas.edu/content/building-word-clouds-generate-search-terms.html>

Voyant in the {virtual} classroom

04

To supplement close reading

Using small segments of text can help pull out key points--see lesson here:

<https://amplabfau.wordpress.com/2018/04/16/voyant-tools-close-reading/>

05

Upload multiple texts

To see trends in a particular genre or authors work--see lesson here:

<https://hfroehli.ch/2019/04/22/usi>

WOMEN IN COMPUTING

In this sample timeline, we'll walk you through what TimelineJS can do by looking at some of the more important contributions women have made to computer science.

TimelineJS ideas

- **A short "in-class" assignment**

Make a collective Timeline and have students add one thing about the history of your class topic.

- **A semesters-long continuous timeline**

Students add entries throughout the semester, providing context for readings on the syllabus--
<https://hcommons.org/deposits/item/hc:31089/>

- **A timeline that spans multiple semesters**

Students add to a timeline started by previous classes-- <https://www.chronicle.com/article/a-pedagogy-that-spans-semesters/>

- **A Final Project**

Students have a choice to submit a timeline in lieu of a paper--
<https://threadreaderapp.com/thread/1278082153461567490.html>

ARTIFACT NAME

World Literature Timeline

CURATORIAL NOTE

Incorporating digital projects into humanities survey courses can be a challenge, as covering a wide range of material is the primary mission of the course. In this assignment, the Timeline project assists with the heavy lifting of providing historical context for the works on the syllabus and gives students exposure to thinking about information as data, doing research in online databases, and reflecting on the process of producing their contribution.

[*TimelineJS*](#), part of the Knight Lab Storytelling toolkit, uses a *Google Sheets* template to feed into the Timeline platform, so students need not learn to code to produce a visually compelling end product. The assignment adapts the University of Oregon FERPA release to give students the option of completing the assignment anonymously or offline. Students are given agency in how they complete the assignment and ownership of their contribution to the final product.
