Community Background Report

Deerfield Beach Livability Study Area

County: Broward

Community Type: Neighborhood

Borders:

North: Palm Beach/Broward County Line

South: Atlantic Boulevard

East: SR A1A

West: Florida's Turnpike

Background

The Deerfield Beach Livability Study Area falls within four cities: Pompano Beach, Deerfield Beach, Lighthouse Point, and Hillsboro Beach.

City	Livability Study Area	Percent of the city's area within the Livability Study Area
Deerfield Beach	40%	90%
Pompano Beach	40%	40%
Lighthouse Point	15%	100%
Hillsboro Beach	5%	50%

The municipalities that make up the majority of the Livability Study Area have some similarities. For example, the largest concentration of Brazilians in Broward is found in the contiguous municipalities of Pompano Beach, Lighthouse Point and Deerfield Beach.¹ The differences between the cities are highlighted below:

The City of Deerfield Beach has a population of 75,185 and nearly the entire city (90 percent) falls within the Livability Study Area boundaries.² As mentioned above, the city has a strong Brazilian presence with numerous Brazilian-owned strip malls and retailers concentrated along Federal Highway.³ In addition, the City of Deerfield Beach is home to:⁴

- Nationally-recognized corporations (e.g. JM Enterprises--ranked by Fortune among the 100 Best Companies to Work For⁵);
- Redevelopment initiatives (e.g. Community Redevelopment Agency projects and golf course redevelopments);
- Emerging research corridor along I-95 (e.g. the Florida Atlantic Research & Development Park that is located within the Livability Study Area); and
- Green space, such as the Deerfield Island Park, a 56-acre site located within the Livability Study Area.

The City of Pompano Beach was originally settled by both Black and White families from northern Florida, Georgia and the Carolinas, as well as a number of Black immigrants from the Bahamas.⁶ One hundred years later, the city's racial makeup is still predominantly White and Black, with a growing number of immigrants--this time Hispanic and Brazilian.⁷ In 2009 Pompano Beach's population was 102,609.⁸ Also worth noting is the substantial seasonal population that spends its winters in the area. Approximately 40 percent of the city falls within the Livability Study Area. One point of interest within the Study Area is the Pompano Citi Centre. This mall, originally known as Pompano Fashion Square, was once the second-largest in the nation, during the 1960s.⁹ The mall fell upon difficult times until it was redeveloped in 2006 into an open-air mall with new facades, new stores, and a new name.¹⁰

The City of Lighthouse Point has a population of 11,201. The entire city falls within the Livability Study Area.¹¹ Lighthouse Point was incorporated in 1956 to prevent

annexation by the City of Pompano Beach.¹² The community is characterized by its small-town atmosphere. The majority of the residences (80 percent) are single-family homes, many of which front the city's 18 miles of waterways.¹³

The Town of Hillsboro Beach is situated on a small peninsula north of Pompano Beach.¹⁴ The town is about 900 feet across at its widest point and has only one road, State Highway A1A.¹⁵ In 2009 the town's population was estimated to be 2,272.¹⁶ Approximately 50 percent of the town falls within the Livability Study Area.

Demographic, Housing & Economic Indicators¹⁷

The following section describes the demographic profile of the Livability Study Area, as well as a few key housing and economic indicators.¹⁸

The Livability Study Area's population grew during the 1990s, but began to decrease during the 2000s. The population is projected to fall to 173,192 by 2014. Despite the change in population, the Deerfield Beach Livability Study Area's median age of 42 is expected to remain the same through 2014.

The majority (69.28 percent) of the Deerfield Beach Livability Study Area's population is White. However, the Livability Study Area has a significant Black population (20.07 percent) and a growing "other race" and Hispanic population. The bulk of the Livability Study Area's population is made up of mostly native-born US citizens (76.27 percent) and English speakers (75.13 percent). It should be noted that 24.46 percent of the population speaks either Spanish or "other Indo-European" languages, most likely Portuguese, due to the large Brazilian population in the Livability Study Area.

Despite a gain in the number of households during the 2000s, the Deerfield Beach Livability Study Area's household numbers have remained flat when comparing 1990 to 2009. The number is projected to fall by 2014. In terms of housing units, there were 89,802 total units of which 60.53 percent were occupied by owners and 25.63 by renters. *The Livability Study Area is experiencing a rather high vacancy rate (13.84 percent).*

Unemployment within the Livability Study Area in 2009 was approximately 6.91 percent. Of those residents that were employed, the majority (15.32 percent) worked in the Education, Health, and Social Services sector. The Deerfield Study Area is also home to numerous large employers. Below is a sample list¹⁹:

- JM Family Enterprises
- United Parcel Service
- List Industries
- Don King Productions, Inc.
- Publix Distributing
- University of Miami Sylvester Comprehensive Cancer Center
- Ibill
- Moving Waters Industries
- Essex Plastic Bags, Inc.
