cades. The breadth of her artistic production encompasses sculpture, furniture, jewelry, public art, functional objects, video, as well as costume and set design. Whether large scale architectural objects or intimately scaled objects, Oka Doner's work is fueled by a lifelong study and appreciation of the natural world, from which she derives her formal vocabulary. She is well-known for creating numerous public art installations throughout the United States, including Radiant Site at New York's Herald Square subway, Flight at Washington's Reagan International Airport, and A Walk on the Beach at the Miami International Airport (1995-2010), which features nine thousand unique bronze sculptures inlaid over a mile-and-a-quarter long concourse of terrazzo and mother-of-pearl, one of the largest public artworks in the world. Oka Doner's numerous other public art projects can be found in federal courthouses, public libraries, hospitals, universities, other transportation centers, and public parks.
