It has been an exciting year for Alpha Eta Mu. Through hard work, we have continued to grow and recognize our members. As our chapter’s 60th year concludes, it is important to highlight the contributors to this success. It is essential that we acknowledge the dedication and support of our dome, our faculty advisor, and our past and present students. For their unwavering support, we are grateful.

Our faculty advisor, Professor Manuel Garcia, is a key figure in our chapter’s success. His guidance and mentorship have been invaluable to our members. We are grateful for his continued support and commitment to our chapter.

The contributions of our chapter’s presidents, past and present, are also noteworthy. Their leadership and vision have helped shape the direction of the chapter and guide it through its various stages of growth. Their dedication to the chapter’s mission has been a driving force behind our success.

We would like to give special thanks to Lizeth Caldera (2008-2009 president) and Sergio Martinez (2009-2010 president) for their continuous help with the society. We are grateful for their leadership and guidance in steering the chapter forward.

Congratulations to our current officers and members. We look forward to continuing our work and achieving even greater success in the years to come.
