The legend of freshman phenom: T.Y.

For about a split second there, the man they call "Goodbye" almost looked mortal.

With two and a half minutes remaining in last Saturday’s Homecoming game against Arkansas State, T.Y Hilton did the unthinkable for FIU fans; he messed up.

On a reverse, T.Y. dropped quarterback Paul McCall’s handoff, a potentially disastrous scenario for a team looking for a score. Of course once the ball popped out, neither McCall nor Hilton panicked. The reason: it’s T.Y.

Instead of going for the fumble recovery, I just said “Let T.Y. take care of it.” McColl said.

Once the ball hit the ground, T.Y. kicked it up to himself, scrambled back to the other side of the field, and heaved up a prayer to Junior Mertile that seemed to take an eternity to fall. When the ball finally settled into Mertile’s hands, the stands erupted with the biggest celebration yet in the young stadium.

HEROIC PERFORMANCE

While he’s not quite wearing spandex and a cape out there, T.Y. is the closest thing to a hero this team’s ever seen. If you haven’t been following the Golden Panthers until now, and are wondering how they went from averaging 15 points per game to 21, you need look no further than the man with the 4 on his jersey.

To go along with his game winning touchdown, Hilton had a school record 199 yards of field goals on six catches and 57 return yards. If that number seems low for the nation’s leader in all purpose yards, it is only because the Wolves did everything in their power to keep the ball out of his hands, going so far as to look away when Hilton popped out, neither McColl nor Hilton panicked. The reason: it’s T.Y.

The legend of freshman phenom: T.Y.

Crowds cheering, cars honking, and DJs blasting an array of music from all the different kinds of floats.

Obama’s plans dissected by former governor

Just days after Barack Obama made history by becoming the first African-American president, former Sen. Bob Graham presented students a preview of how Obama plans to tackle the key issues facing America today.

In his lecture, Graham discussed the significance of the 2008 presidential election, and Obama’s election to the presidency. He said that this election had “rewired the electoral map,” creating more battleground states.

“We were at least 15 or more competitive states,” said Graham. “This made for more areas in which both candidates had to spend a lot of time campaigning in.”

He continued to say that this year’s election broke through barriers and proved that America is truly a country where people of all races can obtain the opportunities they seek.

Graham also discussed Obama’s plans for the economy and national security.

According to Graham, Obama plans to “put money in the hands of the people who are most likely to spend it, in order to help boost the economy. He also suggests that during Obama’s term, there may be more government regulations in the financial markets and a greater emphasis on free space for a massive parade, in which floats built by different Greek organizations were showcased to a large crowd.

Fraternities and sororities were allowed to work together in groups in order to build the time floats.

Convertible cars donated by The College of Engineering and the College of Arts & Sciences.

Bob Graham talks politics post election

GRAHAM, page 1

on decreasing America’s dependence on foreign oil. For national security, Graham told students the number one threat to America is weapons of mass destruction in the hands of terrorists. During Obama’s presidency, he plans to remove all the troops out of Iraq, but he did not mention reducing the 25,000 troops in Afghanistan.

“America needs to rebuild relationships with the rest of the world,” Graham said. He congratulated all students who voted and recognized nized one who was standing in the voting line with him. “You can be a player and use your political power every day to make your life easier,” said Graham. “If students are passive, then nothing will ever get done.”

Graham answered some questions from the audience. “Usually when someone asks a politician a question, they beat around the bush and don’t really answer the question,” said Dino Atikovic, a student majoring in international relations. “He did a great job, because he answered the questions very honestly.”

Even some students who did not vote for Obama attended the lecture. “I agree with his views on Barack Obama;” said Linda Lee, a student majoring in business management. “I did not vote for Obama, but after what I heard today, I understand a little more about Obama’s views.”

The Honors College inducted Sen. Graham as an honorary member of the Honors College at the end of the lecture.

In 1978, Graham was elected Governor of Florida, and in 1986 to the U.S. Senate, where he served three terms and in 2004 wrote the book “Intelligence Matters.” He retired from public office in 2005, and spent the 2005-2006 academic year at Harvard University’s Kennedy School of Government.

Although the partying might be over, with students having to wait another year, lasting memories of their 2008 Homecoming week were made.

“This was probably the best party I’ve ever been to,” said Michelle Cordero, a freshman studying anesthesiology. “Aside from the float parade and the celebration afterward, Homecoming 2008 also featured a week full of events, such as the lip sync competition, the Panther Prowl comedy show and the Interfraternal Council 5k walk/run.

Yet one staple of this very eventful week was cancelled: the naming of Homecoming King and Queen.

A fiver voting for the candidates on Nov. 6, students later learned the event had been called off.

(known as “FIU”). While being built, the float had tiny tissue paper decorated around its surface.

“That float definitely won number one,” said sophomore Julie Osheross. A fiver parade, while the cars were being piled up to be taken back to the dealer, a massive celebration, aptly titled “FIU Ultra” had students changing into the Blue and Gold Panther garages, where students and staff both celebrated the end of the parade with a variety of music provided by renowned DJ’s such as DJ Kenow and DJ Irie.

The event lasted from 8 p.m. until 1:15 a.m. in the morning, with glow light provided by the Homecoming Committee, which was thrown by students to everyone at the party.

POLICE NOTES

Oct. 31 – Nov. 4:

• Oct. 31: Student William Zamora parked and locked his vehicle in the Red Garage, on the fifth level between 11:07 a.m. to 6:22 p.m. Returning to his vehicle, he saw that unknown suspect(s) had popped the driver’s side door, stealing his sunglasses.

• Nov. 3: A student stated that after securing his bicycle at the bicycle rack located in front of the University Park Towers, he returned to it several hours later to discover his bicycle had been taken by unknown suspect(s).

• Nov. 4: A student stated that she parked and secured her bicycle at the Graham Center south side bicycle racks, and then went to class. Upon returning, she discovered that unknown suspect(s) had taken her bicycle.

• Nov. 4: Student reported to Public Safety that his/her parking decal had been stolen from his/her vehicle two days earlier. No suspect(s) at this time.

SGC resolutions address lack of student parking

BARBARA QUIJANO
Staff Writer

Student complaints regarding insufficient parking spaces at the Biscayne Bay Campus have been heard. The council has come up with some solutions to the problem. A student has complained to the Student Government Council that there are not enough parking spaces at the Biscayne Bay Campus. The student said that it would be better if the council could do something about the problem. The council has decided that they will present a resolution to the administration in order to get more parking spaces. The resolution will be presented at the next general council meeting on Nov. 5.

Any resolutions, council bills or appropriations presented to SGC requiring a vote must have two representatives as sponsors before being placed on a meeting's agenda. This excludes a bill proposed by the president in which case it must have one representative as a sponsor, according to guidelines in the Student Government Association constitution.

Two resolutions are being worked on. The first one specifies and reapportions faculty spots and student parking, while the second allows students to partake in faculty parking spaces after 5 p.m. instead of 7 p.m.

"These resolutions would enable students to occupy these faculty spaces two hours before," Neistien said.

SGC-BBC Vice President Kenasha Paul and Jessica Senorin, a journalism and mass communication senator and Neistien proposed these resolutions.

"There is a lack of student parking spaces, and most of the faculty lots are empty," Neistien said.

For a resolution to be passed, it must first be read at the general council meeting. The following week, the resolution is read a second time, followed by a vote, depending on whether it must be amended. Once the resolution is passed, it is sent to administration for approval.

"When it gets sent to the administration, it shows that students have concern and hopefully the administration will be wise enough to implement the resolution terms and reapportion faculty parking spaces to students," Neistien said.

The first reading took place Nov. 6, and the council agreed that the resolution needed to be more specific regarding time, desired faculty spaces and their location.

"We want to have Senorin look and see how many spots would be preferable and adequate," Neistien said.

Assuming that both resolutions are approved by administration, three resolutions will have passed this year, with the first addressing the voucher system for football games.

"Any student can approach any senator with an issue to write a resolution," Neistien said. "This SGA is really working for students and students only.

Panther Power seeks SGA approval as standing council

BARBARA QUIJANO
Staff Writer

Panther Power has offered students at the Biscayne Bay Campus some entertainment options. As a spirit organization Panther Power is kind of already treated as a standing council, said Vera. However, the council would like to have official status within the Student Government Organization. It would allow Panther Power to become a standing council under the umbrella of the Student Government Council.

"Panther Power is a spirit organization, Pep rallies, as well as pajama and tailgate parties, are some of the events Panther Power has offered students at the Biscayne Bay Campus," Paul said. "The Panther Power cabinet is striving to become a standing council in order to gain active members and more respect, according to Vera.

"Panther Power is a spirit organization that has to do with Athletics, [We’re] trying to get students to be more involved and participate on campus, as well as at games, putting on events prior to games to increase the hype," said Vera, a junior majoring in criminal justice.

Currently, the cabinet director is the only member who receives a salary. As a standing council, all members of the cabinet would be paid.

The council would then be funded by the Student Government Association. Panther Power would have to let SGA and faculty know about their plans and events, but the council would still make final decisions for the group.

"Panther Power is kind of already treated as a standing council," said Vera. "As a cabinet director, according to Vera.

"I would still like to have it as a standing council so that maybe in the following years, whoever is the president or director can go ahead and move on from there," Vera said.

"If we can come to a common ground, all logistics are there. It’s very feasible for them to become a standing council," Paul said.

A resolution sponsored by two senators would have to pass in order for Panther Power to be a standing council.

Paul, Neistien and Laura Torres, lower division senator, offered to sponsor and help Vera write the resolution.

"We’re cool with it," Paul said. "That was something I wanted to work on as well." Panther Power has been active for seven years and currently has more than 100 members.

"We are growing intensely; [the] growth is unbelievable from last year to this year. We want students to have fun and enjoy themselves in all of our events," said Vera.

"I’m a little worried that if I don’t do this now, it will be pushed back. So it’s just basically moving forward after I leave."
Homecoming week featured many activities to get students excited for the last home football game versus Arkansas State University.

On Nov. 3, a lip syncing contest was held at FIU Arena. Students performed in front of hundreds of their peers, interpreting the night’s theme, “Reel Out the Spirit” (4, 7).

Panther Prowl was on Nov. 4, and comedians Craig Robinson, DJ Efren, Ralphie May and Tony Rock performed (2).

The Homecoming Parade was held between the Blue and Gold Garages on Nov. 7 at 6 p.m. Several student organizations created floats to parade around the roundabout (3, 8).

FIU Ultra, an outdoor foam and paint party, also took place on Nov. 7 at 8 p.m. between the Blue and Gold Garages (1, 5, 6).

The Golden Panthers went on to defeat Arkansas State 22-21 in Saturday’s game. Photo galleries for these events may be found at fiuwm.com/galleries.
University outlines expected behavior at sporting events; rules not hard to abide

With FIU’s rapid growth has come new building developments and issues our young university has never had to deal with before. This is especially clear with Athletics, more specifically, the football program. This year alone, The Beacon has reported several incidents that have occurred at home football games, such as 47 students being charged with underage drinking, students making offensive chants to a University of South Florida football player while he laid motionless on the ground after injuring himself and students rushing the field after a win over Middle Tennessee. With the new FIU Golden Panthers Pledge of Honor, Fan Code of Conduct, the University has rightly taken a staunch approach to try to educate the student body about what behavior is acceptable at FIU sporting events. The Fan Code of Conduct states that the following behavior will not be tolerated:

- Threatening, abusive or disruptive behavior
- Standing in aisles, portals or concourses
- Entering the field of play (during or after the game), unless properly credentialed or accompanied by an authorized staff member
- Profane or abusive language
- Smoking, except where permitted (NE and SW designated smoking areas [Stadium Club or Suites])
- Possession of alcohol outside the stadium except in designated areas (Stadium Club or Suites)

Our enforcement officials or stadium staff will use all available tools, including paper or plastic cups/bottles, to remove and eject anyone who is not properly credentialed or adhering to the conduct rules and obeying them. These rules are reasonable and will allow students and fans to enjoy the college sporting experience. The Beacon strongly recommends for students and faculty to familiarize themselves with these rules.

As a young university, we have yet to deal with these issues. Although the University has had sports programs since the 60s, the football program was first launched in 2002 and is finally beginning to establish a winning tradition that is generating interest among students and alumni. The Fan Code of Conduct will set the foundation for fans of FIU sports to understand what is expected of them and eliminate any ambiguity of what is or is not allowed.

The University and Athletics have done their part to educate students about what proper behavior is expected at a FIU sporting events. Most of it is pretty much common sense anyway.

Users listening at high volumes for more than an hour a day each week risk permanent hearing loss after five years.

KIMBERLY ENGLEHARDT
Contributing Writer

Can you hear me now? said, can you hear me now? No, this isn’t another Verizon Wireless commercial. This is a public service announcement from your very own ears. The loss of hearing is no longer applied to old people. It applies to us as well, more than ever before.

Before you block me out with your snazzy iPod or turn up your radio at full blast, listen to me ... hear me out ... while you still can! I don’t want my warnings to fall on deaf ears.

But, let’s get down to business. Please lower the volume of your music player. Believe me, it would times that his happened to me. One time, I sat next to this guy who had his iPod so loud I could decipher the song he was listening to. Although I got free listening time sitting next to him, I couldn’t help but lament his future.

Users listening at high volumes for more than an hour a day each week risk permanent hearing loss after five years. This year alone, 80 percent of people listen at dangerous levels when background noise comes into play.

Dr. Fligor later explained that as sound travels through the ear canal, it ends up in the inner ear. When it’s too loud, tiny hair cells, which communicate information to the brain, are either damaged or destroyed. These hair cells are not reconditioned to withstand loud noises for an extended period of time. Over time, the constant loud music can permanently damage the hair cells and your hearing.

According to The New York Times, a European report said that “those who listened for five hours a week at high-volume settings exposed themselves to more noise than permitted in the noisiest factory or workplace.

Maximum volume on some devices can generate as much noise as an airplane taking off nearby.”

Ouch. And you thought music’s a great therapy. It is, but only if the person next to you can’t hear it. I cannot tell you how many students living history!

“Your typical listener is not at risk if they are listening in a quiet situation, but if they are in a noisier situation, such as commuting, they very easily are going to be at risk,” said audiologist Dr. Brian Fligor, according to an interview on ScienceDaily.com. Dr. Fligor’s study concluded that 80 percent of people listen at dangerous levels when background noise comes into play.

Dr. Fligor later explained that as sound travels through the ear canal, it ends up in the inner ear. When it’s too loud, tiny hair cells, which communicate information to the brain, are either damaged or destroyed. These hair cells are not reconditioned to withstand loud noises for an extended period of time. Over time, the constant loud music can permanently damage the hair cells and your hearing.

According to The New York Times, a study recommends to limit listening time to one hour per day and “setting the volume to no more than 60 percent of maximum sound output when using headphones that are placed over the ears — and even less when using ear buds.”

One day after listening to loud music for many years, you’ll remember me. Only then you’d wish you could “hear me out” when I asked you to lower the volume of your music device. Remember, you might “hear” today, but it might be gone tomorrow!

The truth about MP3 players revealed

To a close, we wanted to applaud the efforts of the FIU Students for McCain group; the odds were against you, but you still gave it all you had on campus. We might have had our differences, but in end, I hope we can come together as Americans and unite as we always have, as we always will.

Rivest makes 5 FGs, sets kicking record

FOOTBALL, page 8

down pass from Corey Leonard, as and answer, and that made the score 14-9, in favor of Arkansas St. Dustin Rivest added his fourth field goal to close the third quarter with a 14-12 score.

A Arkansas St. opened the final frame with a 12-yard scoring run from Derek Lawson. Rivest added his fifth field goal, and the score stood at 21-12 with 11:28 remaining.

A four-yard Brett Shankle punt, Rivest found it- self with starting a drive at the Arkansas St. 42 yard line. On the first down, McCall completed a pass to tight end Eric Kirchenberg for 28 yards, but FIU would not be able to sustain the momentum, and would settle for a field goal, which Rivest missed from 27 yards.

The following play will go down in the FIU annals, being mentioned among the greatest in school history. On the first down, Paul McCall attempted to hand the ball off to T.Y. Hilton who was motioning from the left of the shotgun formation. The exchange was sloppy, and they fumbled, and as Hilton booted the ball backward, and eventually picked it up, McCall threw, what would prove to be the block that allowed Hilton to make the play. The freshman receiver scooped up the ball and sprinted back to his left, and threw a wobbly pass to a wide open Junior Martel in the end zone, to give FIU its winning margin, after adding the point after touchdown.

“arizon A opened the final frame with a 12-yard scoring run from Derek Lawson. Rivest added his fifth field goal, and the score stood at 21-12 with 11:28 remaining.

HOMECOMING PARTY

Record-breaking performances lift FIU over Red Wolves

ANDREW JULIAN
Sports Director

The Golden Panthers get back in the win column, squeezing out a 22-21 victory over Arkansas State on Nov. 10 at FIU Stadium.

"Most importantly today, we learned how to fight through adversity, something we had not been able to do before," said head coach Mario Cristobal, about his team (4-5, 3-2 Sun Belt Conference), that trailed for much of the contest.

The Red Wolves (4-5, 2-2) took a 7-6 lead with 59 seconds remaining in the first half, on a 1-yard touchdown run by junior quarterback Corey Leonard, and the Red Wolves held that lead until the 2:04 mark in the fourth quarter.

The game was not all smiles for the Golden Panther offense, although they produced their best offensive game of the season, rolling up a season high 407 yards of total offense, and Paul McCall accounted for 359 of those yards through the air, the second highest single-game total in school history.

Eight times, the FIU offense advanced the ball inside the ASU 30 yard line, and each time, were forced into a fourth-down situation. This inability to convert on third-downs, FIU was 2-of-12, led to a record setting day for kicker Dustin Rivest, who's five field goals broke a school mark for field goals in a single game, set in 2003 by Adam Moss, with four. Rivest also tied his own FIU record of seven field goals attempted in a single contest.

The first two kicks came in the second quarter, and opened the scoring for the contest, with the latter coming with 12:22 remaining, and the former, with 4:33 to go in the half. Both teams moved the ball well in the first half, piling up over 400 yards combined, in total offense. FIU countered these field goals with excellent defensive stands, forcing Arkansas St. to go over on downs on two of their first two possessions in FIU territory.

FIU began the second half with a seven play 45-yard drive that ended with Rivest's third field goal of the contest, this his second from 43-yard. The drive was highlighted by a 32-yard completion from Paul McCall to standout receiver T.Y. Hilton. Hilton finished the game with six catches for a school record 199 yards.

The Red Wolves had 19 first-half points, and were forced into a fourth-down situation on each of their first two possessions.

The Panthers trailed the Bucs 48-38 with five minutes to play in the first half. Barry closed on a 15-3 run to take a 51-39 lead into halftime.

The Golden Panthers shot 26.9 percent in their first college minutes, others made mistakes that gave the Bucs more opportunities to score.

Although FIU held a 16-15 lead with only five minutes to play in the first half, Barry closed on a 15-3 run to take a 30-19 lead into halftime.

THE LEGEND GROWS: T.Y. Hilton caught a school record 199 yards and threw the game-deciding touchdown in FIU's to a 22-21 win.

Lack of college experience by new players in the back court was evident. First-year player Michelle Gonzalez had five turnovers and made only one of four field goal attempts.

"It is hard as a new point guard coming on, we will all be able to work together better and score more points," said Gonzalez. "But as the season goes on, we will all be able to work together better and score more points."

Although FIU held a 16-15 lead with only five minutes to play in the first half, Barry closed on a 15-3 run to take a 30-19 lead into halftime.

The Golden Panthers shot 26.9 percent in their first college minutes, others made mistakes that gave the Bucs more opportunities to score.

Leading the Bucs was Lucy Martinez, who led all scorers with 17 points.

The Golden Panthers got back in the win column, squeaking out a 22-21 victory over Arkansas State on Nov. 10 at FIU Stadium.

Women's basketball drops one and only exhibition game

The women’s basketball team opened the season against Barry University on Nov. 6 at the U.S. Century Bank Arena. It was the first, and only, exhibition game of the season.

The Division II Buccaneers, under head coach Bill Sullivan, created enough offensive and defensive plays to pull out a 26-24 win.

The Golden Panthers were held to only 19 points in the first half.

Returning leading scorer Monika Bosilj went 0-for-4 in field goal attempts and 0-for-3 from the 3-point line. Following suit behind Bosilj were teammates in the back court.
