Drug Bust Delays Career

Mr. Sandra Clark
Dean of Student Services

I would like to share some information about the Drug Statute in Florida which I feel will be useful knowledge for you, your family and friends.

It is clear that the illegal use of drugs and marijuana are becoming too frequent occurrence all over the nation. Drug use and misuse can be discussed from a moral, legal, medical, psychological, recreational or economical point of view. Depending on which perspectives and the situations, positive facts and undesirable positions can be made or negative facts and indefensible positions can be developed. Regardless of your own position, there are facts of law and statutes in this state of drug offenses as spelled out in Florida Statute 893.562.

In essence, it is a policy which might restrict the public education of you or a member of your family for one full year from the date of "court declared" guilt. This does not mean a person need not have probation if the person received probation after a guilty record. The policy is to be enforced here and on all disappointment. He was happy to speak for her. Dean Spence, assisted dean of Student Services, expressed his satisfaction in words, "I personally was very pleased that 13.3 percent of our busy student population took time out to vote. This compares favorably with most other universities. It would probably compare quite favorably with her total commuting institution."

This reporter found the elections particularly exciting. There was obvious tension in the air as the two dooms and the election committee went behind closed doors to count the votes. The new news were heard upon their return was that there would be a runoff for Chairman; between Alex Casals and Diane Haley. Most of the lay political analysts, myself included, felt that a run-off was inevitable. We just didn't know who the run-off candidates would be. Alex had two emotions upon hearing the news of a run-off: joy and disappointment. He was happy to have made the run-offs, while disappointed that he missed being elected by only 58 votes. He needed 363 to win, receiving 304.

Diane received 177. Tomas Arroyo missed the run-offs by only 7 votes, receiving 170. Clinton Clarke, Hastings Arroyo for Assoc. Chairman by a large margin, received 374 votes. Fortunato limped behind with 238. Barbara O’Nan, Scribe, won with 322 votes; Luis Forn captured the Comptroller’s seat with 308 votes; and, the office of Consular went to George Kenney, who took in 238 votes.

Out of the five FIU schools, only two ran enough people to fill, the five associate seats: Arts & Sciences and Hotel, Food, and Travel. Arts & Sciences offered a ballot of 6 candidates, while Hotel, Food, and Travel rallied a ballot of 15 candidates. Two candidates ran for one of the 5 seats from the school of Education and the school of Health and Social Services. There were 3 candidates in the running from the school of Business.

Out of the five FIU schools, only two ran enough people to fill, the five associate seats: Arts & Sciences and Hotel, Food, and Travel. Arts & Sciences offered a ballot of 6 candidates, while Hotel, Food, and Travel rallied a ballot of 15 candidates. Two candidates ran for one of the 5 seats from the school of Education and the school of Health and Social Services. There were 3 candidates in the running from the school of Business.

The greatest number of votes cast for any one associate was 166. Those went to Rick Ferrer from Arts & Sciences.

The people most responsible for organizing and maintaining a smooth running campaign and election are the election committee members and the

Dates to Remember

MAY 31
Last day to preregister for Summer Quarter, 1973.
JUNE 13
Schedules for Summer Quarter will be mailed to students.
JUNE 19
Change Day
Students with schedules who wish to change classes will enter Change Day from 9 am until 8 pm.
Regular degree students who did not preregister and wish to late register will enter Change Day from 11 am until 8 pm.
All Special Students will enter Change Day from 2 pm until 8 pm.
JUNE 20
Classes Begin
JULY 3
Last Day to ADD
Last Day to DROP WITH FULL REFUND
Last Day to DROP WITHOUT A GRADE
Last Day to LATE REGISTER
AUG. 6-23
Preregistration for Fall Quarter, 1973.
Information for Fall Quarter preregistration will be sent to all enrolled students.
SEPT. 21
Change Day for Fall Quarter, 1973
SEPT. 24
Classes begin, Fall Quarter, 1973.
The quality and quantity of food served on our campus has declined significantly. Many students, I believe, feel that enough improvements have been made to satisfy the administrations knowledge of complaints.

The cafeteria continues to serve stale bread and rolls. I cannot consider toasting the rolls a real improvement when so often it is merely disguising the staleness. Large quantities of french fries are cooked at one time, and this causes an unpleasant smell to linger over the peak periods; those which are not sold immediately are kept under warming lights. If you have ever purchased an order of french fries which have been sitting around for awhile then you will be familiar with the cold, soggy flavor.

A large number of students attend a second period class which is not under 12:45. Thus, for many of us lunch does not come until after 1:00 when the variety of sandwiches offered as daily specials are gone. Have you also noticed that the cafeteria does not stock enough of the less expensive sandwiches either; there are days a dollar has to go a long way. Again, in my opinion, we need to coordinate schedules which keep us here for ten to twelve hours per day; this lack of quantity limits our diets significantly.

Students are through eating.

For Drug Expulsion

(1) Any person enrolled as a student in any state supported university or junior college who is found guilty of possessing or selling any narcotic drug, central nervous system stimulant, or barbiturate prior to his arrest, or

(2) Conviction of the person who supplied such drug, stimulant, or barbiturate to the unlawful possession or sale of any narcotic drug, central nervous system stimulant, or barbiturate, as identified or defined in either chapter 398 or chapter 404, may be entitled to a waiver of the determination of his guilt by a court of competent jurisdiction. If adjudicated

(3) Any student subject to discipline or expulsion from a state university

(4) Upon suspension from classes as authorized in subsection (1), the student signed no more than one petition for each office, the election committee found itself doing a lot of work because of the lack of any real campaign activity.

Mr. Ron Arrowsmith of University Affairs and Vice President Mc Dowell made recommendations to improve the food service. Because Servomation is the only source permitted to serve food on campus by contract, the students have no choice but to review this contract and make some changes. I am referring to the possibility of allowing clubs and organizations to sell refreshments at performances and events.

Fla. State Statute

230.582 Expulsion of students adjudged guilty of unlawful possession or sale of narcotic drugs.—

(1) Any person enrolled as a student in any state supported university or junior college who is found guilty of possessing or selling any narcotic drug, central nervous system stimulant, hallucinogenic drug or barbiturate, as identified or defined in either chapter 398 or chapter 404, shall, following an administrative hearing provided by the president of the institution pursuant to rules promulgated by the state board of education to govern the handling of cases, if such suspension is recommended, be suspended from all classes of instruction until the determination of his guilt by a court of competent jurisdiction. If adjudicated guilty, the student shall be automatically expelled.

(2) No student expelled pursuant to this section may be readmitted to any state supported university or junior college for a period of one year.

(3) Any subject to discipline or expulsion from a state university or junior college for unlawful possession or sale of any narcotic drug, central nervous system stimulant, hallucinogenic drug, or barbiturate, as identified or defined in either chapter 398 or chapter 404, may be entitled to a waiver of the discipline or expulsion if he divulges information leading to the arrest and conviction of the supplier of such drug, stimulant, or barbiturate to him, or if he voluntarily discloses his unlawful possession of such drug, stimulant, or barbiturate prior to his arrest.

(4) Upon suspension from classes as authorized in subsection (1), the administration shall notify the parents or parent, or other person or persons in loco parentis, of the suspension and the reason therefor.

ACTION is independently published without state funds by students at FIU. ACTION may be reached thru the Office of Student Services, ROOM 220 PC or ROOM 221 BM. Phone ext. 2442. ACTION welcomes all comments, criticisms, and suggestions. All letters to the editor must be signed and a phone number should be included, however, identification will be withheld at sender's request.

By Fortunato Arroyo

The first S.G.A. elections held on campus to elect five presiding officers and five senators from each school was a copy of many other student government elections across the nation.

Once again it was a popularity contest rather than decisions based on issues. Echoing our previous experience; the junior college and other universities, the candidates who got the most votes were those organized in slates and as an all of action regardless of student needs.

About eight hundred students took time to stop by the polls, most of them were members of some type of recognized student organization on campus. The rest of them either did not have the time, did not know the candidates, or did not give a damn about the campus government.

Seventeen positions for senators out of twenty five were filled, for the remaining eight seats there were no candidates. Students immediately are kept under warming lights. If you have ever purchased an order of french fries which have been sitting around for awhile then you will be familiar with the cold, soggy flavor.

realize that this university has provisions to students in need of us the making of committees at all levels. The election of qualified students to the various positions open in the S.G.A. was one of our chances to participate actively in the growth of this university.

There is still a way for you to be a living part of F.I.U. there are many positions open in the standing committees of the S.G.A. where you can have a say. Students and parents, will you?

Watergate is just one
Gov’t Hanky Panky
Has Many Strange Parts

By Patrick McGarry

Some of the pieces of the Watergate scandal that fit together are ITT, the Vesco affair, the Mexican Laundry, and of course the Ellsberg case. But to each were dedicated to Richard Nixon, his politics and his re-election in 1972. This puzzle has already gained its 15th government official after being linked to the Watergate scandal. Most have resigned or were fired within the past two weeks.

The first few pieces of the puzzle start with good old green backs, “cash”, thousands of $100 bills stuffed into briefcases and sent to on the Nixon campaign by undisclosed supporters. Much of the money never being reported under campaign gift reporting laws. Here are some of the pieces to the puzzle and how they all fit together.

Projections of material library.

THE PENTAGON PAPERS:

Two weeks ago Daniel Ellsberg who had been on trial in Los Angeles for leaking the Pentagon Papers, a classified history of U.S. Involvement in Vietnam to the press. He had all charges against him dismissed because of “misconduct by the U.S.” U.S. District Judge W. Matt Byrne Jr. blamed various governmental agencies including the Central Intelligence Agency, for taking “an unprecedented series of actions” against Ellsberg after he was indicted almost two years ago for leaking the Pentagon papers.

In July of 1971, President Nixon ordered presidential advisor John D. Ehrlichman to set up a special unit in the Executive Office Building next door to the White House. It’s called the Plumbers. A cover up to get government information from getting into the hands of the press.

The squad was to be known as the plumbers and on September 3, they broke into the Los Angeles office of Dita Beard a lobbyist for the Democratic Party of California. They apparently left empty handed but their illegal act helped lead to the dismissal of Ellsberg.

The first few pieces of the puzzle start with good old green backs, “cash”, thousands of $100 bills stuffed into briefcases and sent to on the Nixon campaign by undisclosed supporters. Much of the money never being reported under campaign gift reporting laws. Here are some of the pieces to the puzzle and how they all fit together.

Projections of material library.

THE WATERGATE AFFAIR:

On June 17, 1972 five men in business suits, wearing rubber surgical gloves and carrying canvases and electronic wire taps were arrested at gun point in the Headquarters of the Democratic National Committee. Among those arrested were E. Howard Hunt and Gordon Liddy who were later convicted of burglary, conspiracy and bugging. During the Watergate arrests the police found the five burglars carrying thousands of dollars in crisp $100 bills. Since the trial higher Nixon officials have been implicated in the bugging and later cover up.

They include former Attorney General John Mitchell, John Dean, Ehrlichman, and former White House Chief of Staff H. R. Haldeman and others.

The puzzle also includes the Vesco Affair and the Mexican Laundry Affair both dealing with campaign funds. At the present time Grand Juries in Washington, Houston, New York, and Los Angeles are now looking into various aspects of the scandal. At the present time Sen. Sam J. Ervin (D.N.C.) and his subcommittee arrived in Denver to ask Mrs. Beard about the burglar who says he was left at the office in exchange for a lead into the White House.

So, the puzzle has also included the ITT, the Vesco Affair, the Mexican Laundry Affair which is a pre-requisite or which includes ITT. We invite you to visit our office for discussion and or reading of information relating to your career in business.

To Seniors and Advanced Degree Candidates:

Need help with your career? Need advice in finding a job after graduation? As part of Its total Student Services Program, Florida International University has provided for your use on Office of Career Planning and Placement, located in room 220, Primera Casa.

The Office of Career Planning and Placement provides the following services:

• Career planning assistance (vocational information and counseling)
• Career placement assistance (scheduling on-campus recruiting visits by educational systems, government, business, industry and non-profit agencies)
• Placement credentials file
• Listings of individual position openings
• Other material library.

We invite you to visit our office for discussion and or reading of information relating to your career interests or for registration assistance.

The office is open daily from 8:30 A.M. to 5:00 P.M., Monday through Friday, Evening hours by appointment only.

Psychology

cont. from page 8

school authorities can help improve the educational experience of our children. Much has been learned about the psychological side of human development which Dr. Tikofsky doesn’t think has yet been made part of our school system.

Psychologists working with engineers can help increase our driving safety. As but one example of how they can do this, he said, “There are psychological parameters dealing with the placement of road signs and secondary cues in perception that are available during the day for road signs that are absent at night. As far as he knows, however, there hasn’t been any recent attempt to really apply this data to the use and placement of traffic signs and signals.

Psychologists can help in developing better relations between countries. Right now, the psychology department here is “getting involved in basic research in how you look at things like intellectual development in countries like Panama, Haiti and Guatemala.”

Gives Dr. Tikofsky’s conviction about the role psychology can play in serving the general public, it isn’t surprising that community psychology will be one of the main areas of interest and activity of the psychology department here at FIU.

But, he doesn’t see community psychology in the traditional way in which it is limited to community mental health. Rather, he sees it as “looking at any aspect of the community where the people and the environment interact and the psychological practice is something we want to involve ourselves in.”

He envisions a role for psychology that’s about as wide ranging and complex as life itself.

He envisions a role for psychology that’s about as wide ranging and complex as life itself. But most everything we do because most everything we do involves interaction with our environment and includes psychological interaction.

As FIU approaches the beginning of its second year the people of the psychology department are working to create an exciting and rewarding concept of psychology. They want to see psychologists working with others to make human life better along a wide spectrum of living.

THE GREEN COS

CENTRALLY Located in Westchester. Just at your front door, close to almost FIU, shopping centers, Club house and gardens. 2 swimming pools. Vets Corner

Over the summer we will be evaluating the process we’ve used up to this point and deciding on how we should be doing things for the future. The Regional Office will be contact with the Spring Quarter Veterans as to how to sign up for Advance Payment.

For those of you who will not be here over the summer, it will not be necessary to obtain certifications for Fall Quarter. One Certificate is good for the entire time you are attending the school, unless you make a program change and then you will have to request another Certificate.

At this time, the only thing necessary to begin benefits in the Fall, is that you fill out a V.A. Certification Request Card when you preregister. If there are any changes, you will be notified by mail. As long as you know if you move during the summer.

Beginning Fall Quarter, a new program may be available for additional money to be earned by Veterans. Public Law 92-540 provides for a work-study allowance for Veterans who are pursuing a full-time program of study. You will be notified under Chapter 31 or Chapter 34. The maximum allowance is $250 for 100 hours of service agreed to be performed during an enrollment period. No veteran will be awarded a work-study allowance of more than $250 in any one fiscal year. Since the Veterans Administration is the actual employer, they have set the areas of work to consist of the following:

1. Teaching
2. Medical installation.
3. Social Service
4. Occupational Therapy
5. Nursing
6. Medical installation.
7. Veterans Administration medical installation.

In addition to your regular benefits, Veterans also have Tutorial Assistance available to them. This is used to correct a deficiency in a required subject which is a pre-requisite or which is indispensable to the completion of the students approved program. The forms for tutoring can be picked up in Student Services, PC 279 from Len Bryant.

New Facilities To Serve

It's always a disappointment for me that so few students know about the various community services which offer everything from medical help to apartment hunting. One such service is the South Dade Community Health Center located at 2241 South Dixie Hwy.

Until the new facilities are made ready the Center will continue to operate out of the seven trailers which have been provided by the Dade County.

The Center is funded by the Univ. of Miami and Dade County, and is not adverse to accepting donations. The purpose of the Center, says its total staff, a Social Worker, "is to provide comprehensive care for every one in this Community." Judith stressed the word country, because the Center treats all people in need regardless of their residence.

"The underlying concept of the Center is preventive medicine. More than to just treat people, we try to teach them to care for their health so they will not have to come back to the Center," continued Judith.

Judith—looking tired, but relaxed and directing her tour of the Center that morning—impressed upon us that "the Center is a total one. We work to cause emotional and social change as well as a physical one. We are as concerned with the mind as with the body."

The Social Workers have MSW degrees, or are working toward one, and the nurses are all RN's or LVN's. The doctors are interns from the Univ. of Miami fulfilling their residence requirement by working at the Center. Most have chosen to have their residence there, and all are highly qualified and possess a genuine feeling for people.

The center's services include a Specialty unit, an emergency unit, several laboratories and offices, a social worker, and a psychological and counseling unit. According to Judith, the Center's "emergency units are as almost as well equipped as Jackson Hospital."

In all cases, students patients are given a rating ac-
cording to their ability to pay. Patients are awarded either A, B, C, or D ratings. "A" patients pay nothing, "B" patients pay one-third of the cost, "C" patients pay two-thirds, and those un-fortunate enough to qualify as "D" patients pay the full amount. However, it is still cheaper to pay the full amount than to pay regular doctors' fees.

The Center is open from nine to five everyday and half a day on Saturdays.

If your financial situation is anything like mine you might consider paying the Center a visit. They are open to anyone who is interested in placing the word country, because the Center treats all people in need regardless of their residence.

name

Relations Dean

The Board of Regents, meeting in Tallahassee today, have accepted the resignation of Maria W. Anderson, a leading Florida newspaperwoman and director of the Commission on the Status of Women, as Dean of University College at Florida In-
ternational University in Miami. Ms. Anderson is the only woman to hold a Deanship in this position in the State University System of Florida.

Now a feature writer and special projects coordinator with The Miami Herald, Ms. Anderson was nominated for the position by Dr. Charles E. Perry, President of Florida International.

"Marie Anderson has been an outstanding Florida journalist and editor for more than 30 years," said Dr. Perry. "She has an excellent reputation in her field and she works extremely well with people. She will bring a great deal of experience to the University and we are very fortunate to have a woman of her caliber on the Florida International staff."

Ms. Anderson has broad knowledge of the University's operation, having served as one of the original members of the Florida International University Foundation Board of Trustees.

Ms. Anderson brings to her new post a distinguished career in media and public service. From 1959 to 1971, she served as cont. on page 7

Experience
cost from page 5

"Good, you take him the first five years."

"No way" I said getting in my car.

"Where are you going?" she asked.

"Home to rest up for next week," I said starting the car. I never heard what she said then, running in repeating "Home to rest up for next week," I said starting the car. I never heard what she said then, running in repeating.
I arrived promptly at my destination. I was to meet my fellow classmates there and we would be assigned a young boy to teach. These boys come from broken families and some of them are emotionally disturbed. I walked in the door and saw Linda. She was huffing and puffing and searching what was now an empty hall. “Have you seen a little kid in blue jeans with bare feet?” she asked, half pleading. I shook my head, unable to help her. “Oh, you wouldn’t believe this one...he’s a devil...the worst one ever. This is the third time I’ve lost him, and I’ve only been here eleven minutes!” I thought she was kidding. “What’s his name?” I asked, “Tell me if you hear anything.” I said trying to help. “It’s George,” she said, “Come let me introduce the professor; as she raced down the hall.

Mr. X came in the hall and asked if I was one of the students from FIU. He ushered me into his office and started explaining the “system” to me. “I’m going to assign you to Freddy on Monday. This is an old boy that we’ve had here for two months now. He’s below his group, so I’m looking for a boy that’s above his group. I’ll have to assign you Peter for the following day. He is a real charmer.” I felt relieved that I wouldn’t have to bring my suit of armor and whip. I’ve only been here eleven minutes!” I thought she was kidding, “Tell me if you hear anything.” I said looking over Freddy’s folder. “I’ll have to assign you Peter for the following day. He is a real charmer.” I felt relieved that I wouldn’t have to bring my suit of armor and whip. I’ve only been here eleven minutes!” I thought she was kidding, “Tell me if you hear anything.” I said looking over Freddy’s folder. “I’ll have to assign you Peter for the following day. He is a real charmer.” I felt relieved that I wouldn’t have to bring my suit of armor and whip. I’ve only been here eleven minutes!” I thought she was kidding, “Tell me if you hear anything.” I said looking over Freddy’s folder. “I’ll have to assign you Peter for the following day. He is a real charmer.” I felt relieved that I wouldn’t have to bring my suit of armor and whip. I’ve only been here eleven minutes!” I thought she was kidding, “Tell me if you hear anything.” I said looking over Freddy’s folder. “I’ll have to assign you Peter for the following day. He is a real charmer.” I felt relieved that I wouldn’t have to bring my suit of armor and whip. I’ve only been here eleven minutes!” I thought she was kidding, “Tell me if you hear anything.” I said looking over Freddy’s folder. “I’ll have to assign you Peter for the following day. He is a real charmer.” I felt relieved that I wouldn’t have to bring my suit of armor and whip. I’ve only been here eleven minutes!” I thought she was kidding, “Tell me if you hear anything.” I said looking over Freddy’s folder. “I’ll have to assign you Peter for the following day. He is a real charmer.” I felt relieved that I wouldn’t have to bring my suit of armor and whip. I’ve only been here eleven minutes!” I thought she was kidding, “Tell me if you hear anything.” I said looking over Freddy’s folder. “I’ll have to assign you Peter for the following day. He is a real charmer.” I felt relieved that I wouldn’t have to bring my suit of armor and whip. I’ve only been here eleven minutes!” I thought she was kidding, “Tell me if you hear anything.” I said looking over Freddy’s folder. “I’ll have to assign you Peter for the following day. He is a real charmer.” I felt relieved that I wouldn’t have to bring my suit of armor and whip. I’ve only been here eleven minutes!” I thought she was kidding, “Tell me if you hear anything.” I said looking over Freddy’s folder. “I’ll have to assign you Peter for the following day. He is a real charmer.” I felt relieved that I wouldn’t have to bring my suit of armor and whip. I’ve only been here eleven minutes!”
Baseball in Central America... where college ballplayers are given the hearty welcome of professionals, in a land where people from all levels of society abandon their television sets to attend athletic activities. When it comes to goodwill, the Florida International University baseball squad and Coach Tom Wonderling entered Guatemala, Honduras, and Nicaragua, to play a ten game schedule, with the promotion of American collegiate interests in mind. They emerged from Latin American soil with seven wins under their belts, to give the Sunblazers a final 3-0 and 18-1 hit to the Sunblazers an early lead with Miamian Howie Finkelstein gave the FIU team in the initial game against Motos Suzuki, where he was relieved by FIU's number one pitching prospect, former Austin Peay star, Bill Fireline, who tossed for five innings of no hit ball.

The Sunblazers played their remaining four games in Nicaragua for the benefit of the relief fund, established to rebuild the city of Managua, destroyed by an earthquake last December. The FIU lead could not manage to get the runs across, as the Nicaraguan All-Stars utilized their defensive efforts to stop FFU, 4-2. Canadian pitcher for the Sunblazers, Guy Beliveau could not match the Latin talent, and hurled for four innings before he was relieved by FIU's number one pitching prospect, former Austin Peay star, Bill Fireline, who tossed for five innings of no hit ball.

Florida International's winning ways were revived in the 107 degree heat against the Leon ball players, Sem Lombardo pitched a five hit shutout to give the Sunblazers a final 3-0 and their sixth victory of the trip. Progressive Ron Hodges was at last four times, earned two hits and a two run double in the fifth inning. Chirinogos could not catch up to FFU's 7-4 rout, despite a rally in the ninth inning, to give the Sunblazers their final win on an enjoyable visit to Latin America. They dropped their concluding game, 5-2, to Equipo Nacional, after becoming victim of the best pitching talent in Nicaragua.

Dean Glenn A. Gareau accepts one of the many momentos on the Sunblazers baseball tour of Central America. Head Coach Tom Wonderling makes the presentation. The trophy read, “Blazing the way” the title of the series Honduras U.S Florida International University.

Confidence was instilled into the FFU team in the initial game against Motus Sukurii, where Miamian Howie Finkelstein gave the Sunblazers an early lead with a three run homer in the second inning and a run scoring double in the third, producing an 8-2 victory. Florida International swept the remaining two games 5-1 over Medias Verdes. Baumgardner pitched 7 and one third innings of two hit ball, before he strained a muscle and was replaced by Ralph Alvarez-Avendino.

The Sunblazers played their remaining four games in Nicaragua for the benefit of the relief fund, established to rebuild the city of Managua, destroyed by an earthquake last December. The FIU lead could not manage to get the runs across, as the Nicaraguan All-Stars utilized their defensive efforts to stop FFU, 4-2. Canadian pitcher for the Sunblazers, Guy Beliveau could not match the Latin talent, and hurled for four innings before he was relieved by FIU's number one pitching prospect, former Austin Peay star, Bill Fireline, who tossed for five innings of no hit ball.

Florida International's winning ways were revived in the 107 degree heat against the Leon ball players, Sem Lombardo pitched a five hit shutout to give the Sunblazers a final 3-0 and their sixth victory of the trip. Progressive Ron Hodges was at last four times, earned two hits and a two run double in the fifth inning. Chirinogos could not catch up to FFU's 7-4 rout, despite a rally in the ninth inning, to give the Sunblazers their final win on an enjoyable visit to Latin America. They dropped their concluding game, 5-2, to Equipo Nacional, after becoming victim of the best pitching talent in Nicaragua.

Students Bring Industry Executives To Campus

To enable the students to gain additional practical experience, the School of Hotel, Food and Travel Services hosted the May meeting of the South Florida chapter of the Hotel Accounatants Association.

The reception and dinner portion of the meeting was completely planned, prepared and served by students in the School's Volume Feeding Management course.

One of the student's goals in the School was "manager" of the banquet. It was his responsibility, with the guidance of Dr. William Morgan, the course instructor, to plan the menu, determine the amount of food to be purchased, set up and decorate the dining room—P.C., and schedule his fellow classmates as his "employees."

Catering of an affair of this type is not entirely without its problems. With the food preparation facilities located in a "home style" food building, the students prepared the dinner Casas and the dinner to be served on the fifth floor, the students had to transport the food on the passenger elevators using taping carts as tray carriers. Moreover, the students had to rent the china, glassware and linen as there is not sufficient number of these items in the lab to serve the 70 plus members who attended the dinner, and no commercial kitchen, refrigeration, service or storage facilities are on campus.

Despite these obstacles, Frank was optimistic about the success of the project and had a "real show" for the Association. He served the banquet "French style," meaning much of the cooking and service was completed in a "workshop" setting.

For example, the entrée, Flambeed Breast of Chicken, was actually flamed at each table. This, Frank explained, insured that the food was served hot, and also increased the learning experience for the students.

By hosting the Association, the School and its students became more involved with the community. Other services are planned to be offered to the South Florida Hospitality Industry as part of the School's community service goals.

The Hotel Accountants Association, for its part, has been very supportive of the activities of the School and the members of the School and the members of repeating.

The Hotel Accountants Association, for its part, has been very supportive of the activities of the School and the members of the School and the members of repeating.

The moral of this story is that if you explain these little tidbits before you go fishing, maybe you have in instrumental in setting up a seminar course this summer for the students.

The seminar to be taught by Professors George Conrade and Charles Ivento of the School of Hotel, Food and Travel Services, both members of the Hotel Accounatants Association, will focus on different South Florida hotel, club or restaurant each week.

Students will tour the operation, meet with various executives, and then prepare a written report on their observations, which will be discussed with the management executives of each company.
Dr. Ronald Tikofsky

"Psychology has to go public"

By Bob Foreman

"Psychology has to go public." With this quote from George Miller, Dr. Ronald Tikofsky, chairman of the FIU psychology department, expressed his conviction that many psychologists must come out of their laboratories and become active, integral members of their communities.

Most people think of psychology as being for the mentally ill. The science did indeed begin in efforts to help people with mental illness and this is still an important part of its work. But, Dr. Tikofsky enthusiastically explained, there is more and more it can do to help the psychologically healthy.

Many of society's problems, such as psycho-social and environmental problems, may be better understood, he believes, if some of the knowledge and technology gained in the laboratory is applied to everyday life.

He pointed out that experimental psychology was important in World War II and that some psychological knowledge is being used today.

Such knowledge, for example, is being applied in some aspects of behavior modification and in some areas of industry. He made it clear, though, that he believes this is only the barest hint of the service psychologists can give to us all.

A lot of important information about perception, skill-learning and many other functions is not yet being applied to the day to day problems and responsibilities of life.

One reason for this, he said, is that the researchers who acquired the information have not gotten out and tried to apply it.

Also, the public idea of psychology as something only for the mentally ill has tended to restrain its wider use.

And what is this wider use of psychological knowledge? How can psychologists help improve your life?

Dr. Tikofsky suggested a few everyday applications of such knowledge. These suggestions show but a few of the many ways psychologists can help us all.

Psychologists working with architects can help make our homes more healthful and comfortable. For instance, what psychologists already know about size perception and space perception "can be intertwined with what an architect does so that if you're limited in size you can at least create a psychological effect of spaciousness by the proper use of color and the manipulation of walls and open space."

Psychologists working with
