Our Mission

The mission of FIUURJ is to create a platform to showcase an array of undergraduate research across STEM, the Humanities, Social Sciences, and the Arts, while being freely available to the higher education community as a whole. As an open-access, blind-reviewed multidisciplinary journal, we ensure that student scholarship receives multilayered support in order to impact and enrich a wide range of compelling fields. FIUURJ, run by undergraduates alongside faculty advisors and volunteers, offers opportunities for FIU students and alumni to gain experience in copy-editing, digital project creation, peer-reviewing, and peer-advising. We aim to empower undergraduates to contribute meaningfully to academic discourse and cultivate expertise in scholarly communication early in their higher education experience.
